

Dates of Significance in the life of Jesus Christ

Issue date: 02 Aug 2007

The dates given here are very provisional and only based upon using dates and periods given within the Bible and other external references. Some dates are more firmly placed in history than others. The more detailed aspects being days of the week are there to assist in setting 'the flavour' for the reader, though this may cause some derision amongst the sceptics!

I do sincerely welcome genuine and positive input to this from readers so that I can modify certain aspects of this listing if it is required.

However for other readers please use this as a reference point until further research material can be gathered to either support or modify what is stated here. It has been presented as a start – subject to further modification.

Sacred Years of 354 days (not the 365.23 days to a year as they are now)
