

These talks are presented within several different subject topics.

These are examples of what **I would like to see given as a sermon** (public talk) rather than perhaps what we witness within very worldly Christian congregations of our present era.

These examples profusely quote The Bible and most clearly explain their subject matter. I strongly urge the reader to go to different Christian groupings each week until they find a grouping that gives sermons like these. When you have found them – then stay with them for your own protection! Use all the material on this website both as a guide but also as an Auditor's listing against which you may audit the quality of most inadequate sermons! Being most sermons given in The World that Yahweh would utterly disapprove!

For those who desire not to leave their obviously deficient religious leader then I strongly urge the congregational members to demand from their teachers why do they not receive this type of sermon from their religious leaders rather than the empty sermons of absolutely no substance that they presently receive!
